

Asignatura	Datos del alumno	Fecha
Programación visual	Apellidos: Gonzalez Alvarez	19/06/2023
	Nombres: Samuel Sebastian	
	Paralelo: Tercero "I"	

Archivo models.py

```
tarea1 > models.py
1  from django.db import models
2
3  class Clientes(models.Model):
4      nombre = models.CharField(max_length=30)
5      direccion = models.CharField(max_length=50)
6      email = models.EmailField()
7      telefono = models.CharField(max_length=7)
8
9  class Articulos(models.Model):
10     nombre = models.CharField(max_length=30)
11     categoria = models.CharField(max_length=30)
12     precio = models.IntegerField()
13
14 class Pedidos(models.Model):
15     N_Pedido = models.IntegerField()
16     Fecha = models.DateField()
17     Entregado = models.BooleanField()
18
19
```

Archivo admin.py

```
tarea1 > admin.py
1  from django.contrib import admin
2  from .models import Clientes, Articulos, Pedidos
3
4
5  # Register your models here.
6  admin.site.register(Clientes)
7  admin.site.register(Articulos)
8  admin.site.register(Pedidos)
9
10
```
